PARAMOUNT BED

Basic type KY-45SB

Meets basic management needs for use in medical facilities

Only one drawer system with dividers

For safety reasons, the drawers are in the unlocked position, more than 2 drawers cannot be opened at the same time. Moreover, specially designed dividers are provided with 3 different sizes of drawers for orderly management of medicine and diagnostic materials.

Only one drawer system

Example of use

Additional dividers

Always only one drawer is available for safety.

Handle

The cart comes with an ergonomically designed handle for easy transportation.

Push-style sub-table

A smart sub-table is available as needed depending on the type of work to be done in a hospital ward. The edges of the table are raised to prevent items from falling off. The table comes with small sections into which tools can be organized effectively.

Caster

Exclusive 125-mm casters have a diagonal-locking system to prevent the cart from being moved inadvertently. In addition, one of the casters is anti-static to ensure reliable use in a hospital ward.

Fully locking key mechanism

All drawers are fully locked with only one keyhole being locked. This function dramatically enhances work efficiency and prevents a drawer from being left unlocked.

Medicine type KY-45MB

Comes with added features for the "Management of medicine"

Transparent medicine cases with name plate

The specially designed transparent cases are equipped for the efficient management of medicines. The contents can be taken out immediately, and its transparent feature makes users easy to confirm the contents of cases.

Emergency type KY-40QR

Comes with added features for the "Use for emergency"

Disposable serial seal management system

The Emergency type cart has an original disposable serial seal for managing emergency material efficiently. It is very easy to confirm whether emergency materials are ready or not at a glance by checking the seal, which is set once medicines and diagnostic materials for emergencies have finished being placed in the cart. There is no need to recheck the contents of the cart while it is sealed. Tearing off the seal allows users to quickly access the contents of the cart.

Ready for use state (Management stage)

Available for use state (Actual use stage)

Oxygen cylinder holder

The oxygen cylinder holder is provided as a standard accessory for the emergency cart.
Note: A 500-liter-capacity oxygen cylinder is available.

Standard accessories for the Emergency type

-**IV hanger rod**

-**CPR board with storage**
